

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building cloud-backed platforms, backend services, and automation tooling across Cisco and recent U.S. internships. Hands-on experience with AWS, Azure, AKS, Terraform, Docker, CI/CD, Linux-based systems, Python, Java, observability, and platform automation. Delivered cloud migration, deployment automation, telemetry pipelines, and monitoring solutions that improved reliability, reduced manual effort, and accelerated incident detection. AWS Certified Solutions Architect Associate and M.S. in Computer Science candidate at The University of Texas at Arlington, graduating May 2026.

TECHNICAL SKILLS

- Cloud / Infrastructure: AWS, Azure, AKS, Terraform, CloudFormation, Docker, Linux (CentOS, Ubuntu labs), CI/CD, Jenkins, GitHub Actions, GitLab, Datadog
- Networking: TCP/IP, subnetting, routing, switching, DNS, load balancing, network troubleshooting, VPC and security fundamentals
- Languages / Frameworks: Python, Java, TypeScript, React.js, Django REST, PHP, .NET
- Data / Platforms: PostgreSQL, MongoDB Atlas, RabbitMQ, Kafka, Redis, Power BI, Power Automate, Databricks, Microsoft Fabric
- Certifications: AWS Certified Solutions Architect Associate, Cisco Certified Network Associate (CCNA), Cisco DevNet Associate, Microsoft Certified: Azure Fundamentals, Certified Scrum Master

EXPERIENCE

Cloud Engineering Intern | Toshiba Global Commerce Solutions | Frisco, TX

Sept 2025 - Present

- Automated identity, policy, and governance workflows in Azure using Terraform, Azure Policies, Entra ID groups, Jenkins, and GitLab CI/CD, reducing manual cloud administration effort by 60%.
- Designed and deployed Datadog dashboards for Databricks ETL pipelines to monitor job health, latency, and failure metrics, enabling faster issue detection and incident response.
- Optimized Power BI semantic models and Power Automate jobs for 53 supermarket chains, improving reporting automation by 95% and supporting real-time analytics for AI and ML use cases.
- Reduced cloud spend by more than \$50K through FinOps-driven refactoring of Microsoft Fabric workloads to lower-tier SKUs.

Software Developer Intern | Paycom | Irving, TX

May 2025 - Aug 2025

- Built an internal platform using .NET, React.js, and MS SQL to automate employee data management workflows; designed REST APIs with LINQ and normalized schemas to improve reporting accuracy and reduce manual tracking.
- Developed a GenAI chatbot using LLaMA to automate responses to frequently asked user questions, reducing manual instructor effort by 70% and improving internal data accuracy.
- Built a conference web application in Next.js and React.js with QR-based attendance workflows, integrating with PHP REST APIs to support real-time Learning and Development sessions.

Software Engineer | Cisco Systems | Bengaluru, India

Aug 2020 - Jul 2024

- Led migration from on-prem infrastructure to AWS using CloudFormation, Docker-based microservice deployments, and Bash automation on Linux servers, reducing deployment time from 3 days to 5 hours.
- Designed and implemented CI/CD pipelines using Jenkins and GitHub Actions for deployments to AWS stage environments, reducing build effort by 26 hours.
- Developed Django REST microservices that interfaced with the Docker Engine API to automate container lifecycle management on Linux CentOS, reducing manual provisioning latency from 10 minutes to less than 60 seconds.
- Built Python data pipelines using RabbitMQ, Kafka, Redis, and Celery, improving network monitoring capacity by 80% and increasing telemetry processing reliability.

- Set up automated ETL workflows using CRON to ingest Excel files from remote servers, persist KPI and JSON data for operational dashboards, and manage weekly log rotation through logrotate on CentOS 7.
- Optimized PostgreSQL queries using joins, subqueries, materialized views, and pgTune, reducing execution time from 15 minutes to 5 seconds and cutting dashboard response time by 70%.

EDUCATION

The University of Texas at Arlington | Arlington, TX

Master of Science in Computer Science | GPA: 3.78

Aug 2024 - May 2026

Jawaharlal Nehru Technological University | Anantapur, India

Bachelor of Technology in Computer Science | GPA: 3.6

Aug 2016 - Aug 2020

ADDITIONAL CERTIFICATIONS

- CodePath Technical Interview Prep
- Artificial Intelligence (AI)-110 with Anthropic Claude (In Progress)

LABS AND FOUNDATIONAL EXPERIENCE

- Built networking fundamentals through CCNA labs covering subnetting, routing, switching, DNS, and troubleshooting across Linux-based lab environments including Ubuntu.
- Developed foundational exposure to Azure Kubernetes Service (AKS), Ubuntu administration, and cloud networking concepts through certification labs and guided hands-on practice.
